Tesseract *Accelerator*

In Collaboration With:

Mission

Our mission through the **Tesseract Accelerator** is to empower innovative projects by providing comprehensive support across Advisory, Marketing, Business Development, and Community.

By bringing together visionary projects and experienced leaders, our goal is to use our Track & Funnel method to focus on projects that receive grants from the **Base ecosystem**.

First Step

Begin your integration into the Tesseract program by completing our specially designed Intake Form. This form is your first step towards collaboration, enabling us to tailor support and resources specifically to your project's needs. By providing detailed information about your team, goals, and current challenges, you help us set the stage for a fruitful partnership.

Sign-up on our Intake Form and propel your project into the future.

Tesseract

Welcome to the Tesseract Track

We're excited to explore how we can support your project's growth. Please provide the following information to help us better understand and connect with your team.

Takes 7+ minutes

Start

Process Flow

Complete Form

1

Start by filling out the Intake Form to provide us with detailed insights into your project's scope and needs.

Account Executive

2

Get matched with a dedicated account executive who will be your primary contact and guide throughout the integration process.

Strategic Collaboration

3

Receive expert advice and support within key areas, such as marketing, business development and community growth.

Achieve Milestones

4

Successfully complete the track with enhanced capabilities and strong network connections within LDA's network, Base ecosystem, and beyond.

Advisory

Gain access to top-tier advisory services from seasoned experts in blockchain. Whether it's technical guidance or strategic positioning, Tesseract is here to provide insights that align with your project's vision, helping you make informed decisions and strategically position your project for success.

Marketing

Amplify your project's voice through curated appearances at events and Spaces such as QuickSwap's "The Aggregated." Receive a tailored marketing audit and framework via our Track & Funnel method, helping your project gain exposure and increase impact.

Business Development

Accelerate your growth by forging strategic partnerships within our network and the Base ecosystem. Benefit from collaborations with leading DEXs, DeFi protocols, and other ecosystem projects, unlocking new avenues for collaboration and cross-promotional opportunities to drive your project's success.

Community

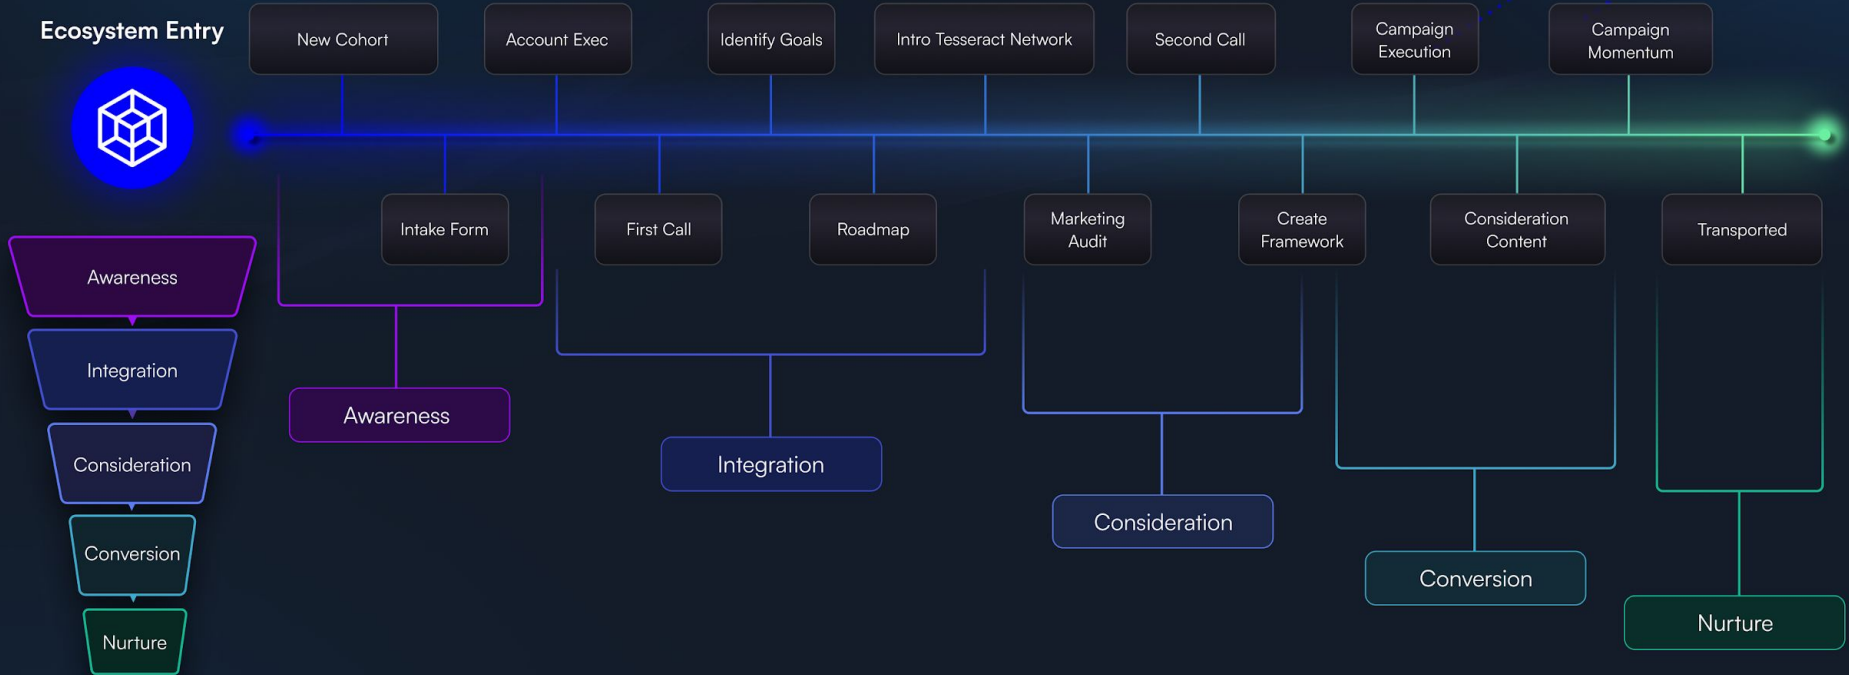

Foster a thriving community around your project with a focus on a large-scale campaign, Telegram and Twitter growth, and active engagement. We help you cultivate an environment where community members participate and advocate, driving discussions, sharing insights, and spreading your project's vision.

Track & Funnel

A repeatable execution framework for ecosystem integration and growth

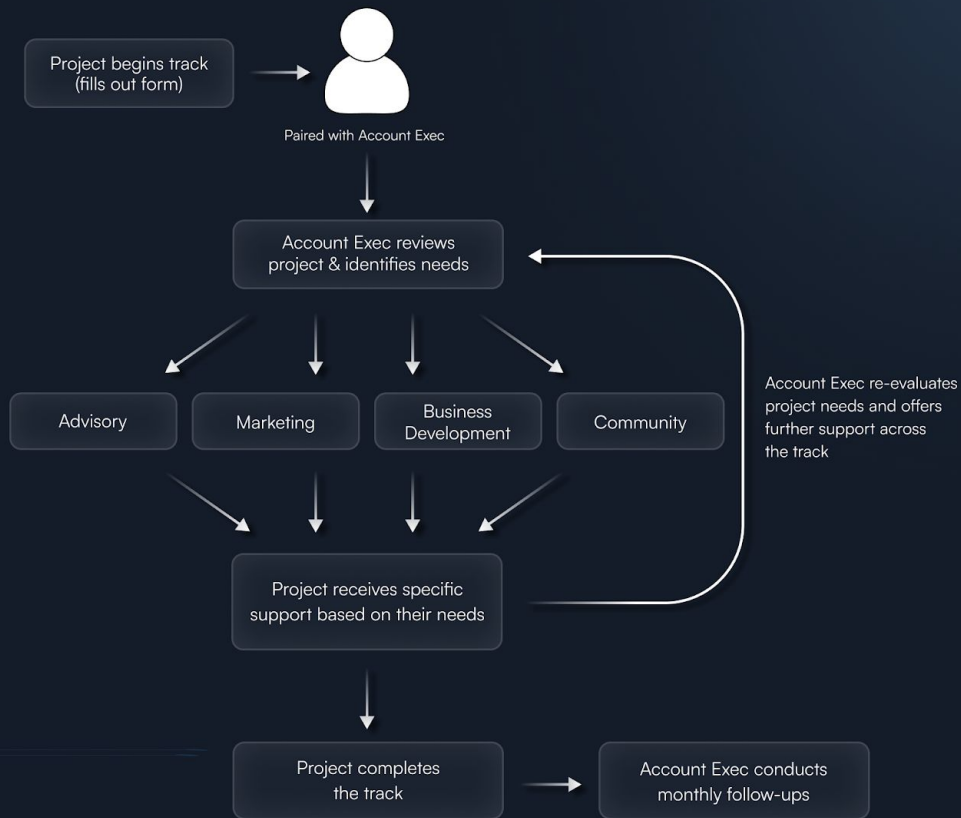

Network & Connections

Account Execs

Each project joining the Tesseract track will be paired with a dedicated Account Executive. Your Account Executive will provide personalized guidance, helping you navigate the Tesseract track efficiently while offering strategic insights tailored to your project's unique needs. After completion of the track, we will conduct monthly follow-ups to ensure your project's success.

Leadership

LDA is led by seasoned Web3 operators with a track record of building category-defining ecosystems — spanning incubation, growth, and media. Leadership is available for interviews, panels, podcasts, and expert commentary.

Roc Zacharias
CEO, Lunar Digital Assets

Roc Zacharias is a veteran Web3 entrepreneur and ecosystem builder. As CEO of Lunar Digital Assets (LDA), Roc has incubated and supported the growth of foundational blockchain projects across DeFi, infrastructure, and other ecosystems. He is also the co-host of The Aggregated and has worked across investor and builder networks to support early-stage founders and accelerate adoption.

Aztec Amaya
CSO, Lunar Digital Assets

Aztec Amaya is a true sound-money advocate and expert Web3 strategist. As CSO at Lunar Digital Assets (LDA), he played an instrumental role in Matic Network's rebrand and Polygon expansion. As a community-centered individual, Aztec helps co-host The Aggregated—a podcast known for deep industry insights—Aztec is also a LitVM co-founder, Litecoin's Virtual Machine, enabling smart contract capabilities and Web3 applications for Litecoin.

Richard Stangland
Chief of Staff, Lunar Digital Assets

Richard is Chief of Staff and Events Coordinator at Lunar Digital Assets, the venture studio behind Polygon, QuickSwap, and other leading industry projects. He also serves as Investor Relations Manager & Global Events Coordinator at BitAngels, and is a Core Contributor to LitVM. Richard maintains strong relationships across multiple ecosystems and builder networks. Bilingual in Spanish and English.
