

zk-Powered Litecoin Layer-2

Pitch Deck v1.1

Proposed for: Litecoin Foundation

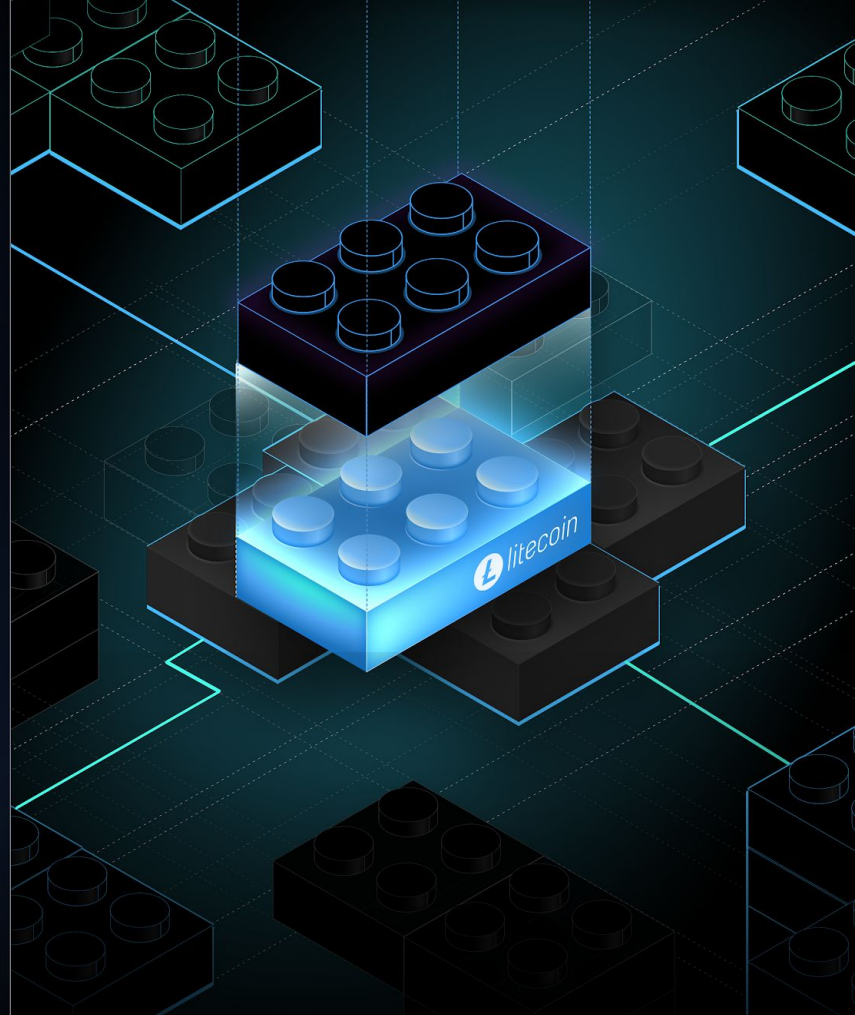

Unleashing Litecoin's Potential

LitVM is an EVM layer-2 ecosystem powered by Litecoin, designed to unlock the full spectrum of Web3 functionality for the Litecoin community. Lightning fast, utility-rich, AggLayer unified liquidity, and community-driven.

As a true Layer-2 of both Litecoin and Ethereum, LitVM provides ultimate security for Litecoin users while enabling builders to innovate and provide new applications and use cases for the Litecoin community.

Our Mission

- Create more demand for LTC
- Unlock new use cases for LTC and Litecoin-native assets
- Foster a utility-driven future for Litecoin users
- Enable yield-generation opportunities for LTC holders
- Create a vibrant Litecoin-focused ecosystem

Equipped for the Future

Utility-Rich Ecosystem

50+ ecosystem projects have already committed to launching on LitVM, ready to serve the Litecoin community with new use cases and functionality.

Litecoin-Native Asset Focus

LitVM will facilitate a renaissance of Litecoin-native assets through its vast ecosystem of utility-rich applications and incentives for users who bridge natively-minted Litecoin Ordinals, Runes and LRC20s.

- Encouraging more on-chain activity for the Litecoin base chain
- Enabling new yield-generation opportunities and incentives for new and existing Litecoin-native asset minters/holders
- Providing a vibrant Web3 application ecosystem for all Litecoin-native asset holders

Community-Driven Ecosystem

51% of the token supply is reserved for the community — prioritizing current Litecoin holders and welcoming new participants to join and engage in the broader ecosystem.
